

---

Transdisciplinary Education is future-oriented education, focussed on complex real world problems.

This TRAIL is designed as a mountain trail, guiding you through the various stages of discovering, designing and participating in Transdisciplinary education - from the discovering phase in the valley to making real world impact on the top.

The torches and resting camps which you will encounter on the way, provide in-depth knowledge, ready to use tools, inspiring examples and reflection questions.

Almost ready to take off!
