
Introduction

The evaluation data you collect—both throughout and at the end of the transdisciplinary education process—can be used in various ways.

You use the outcomes to **adjust current plans and practices**.

This might mean modifying the transdisciplinary education program, starting new initiatives, or discontinuing certain aspects.

At the level of participating partners, evaluations provide valuable insights into their **learning and development cycles**. You also share the evaluation results with various **external stakeholders**. This promotes **transparency and engagement**, and increases the likelihood of the project being embedded in different contexts.

On the **practice page**, you'll find a useful template for creating an evaluation plan.

Theory

This page is still under development. More theoretical insights will follow soon.

Sign up for the newsletter to stay informed about content updates.

Practice

Creating an evaluation plan helps facilitate dialogue about what and how you want to evaluate.

It’s important to develop this plan together and in a timely manner.

Evaluation Plan Template

Evaluation Goal	What to Evaluate	Tools	Timing of Evaluation	Stakeholders (who will use the tools)	Feedback and Follow-up
